Important Washington state update

NGL is excited to announce that all sales restrictions in Washington state are eliminated effective immediately! We are able to lift the restrictions due to new business application submission levels returning to normal and our underwriters reaching a decision on 97% of Washington state applications as of November 1, 2021 on business that was submitted since June 1, 2021.

As a reminder, there will be full charge back of commissions on any Washington state applications submitted from May 24, 2021 - November 10, 2021 where the premium is not paid into the second year of coverage.

Thank you for your patience while we dealt with the influx of business that the Washington State Cares Fund generated. As challenges like these arise in the LTC marketplace, NGL will adapt to give you and your clients the best possible service. must be utilized for applications and new PAC form requests signed and dated October 1, 2021 and after.
